Academic Background

Computer Systems Engineering
Intern at Unitec (5 years).

Languages

Spanish
English

Education

Discovery School

High School Diploma in Science and Humanities - June 2019

Unitec, San Pedro Sula, Honduras 2019 - 2024

Bachelor's degree in Computer Systems Engineering

Work Experience

Mobile Developer - Grupo Incova (August 2022 - September 2023)

During my time at Grupo Incova, I led the introduction of messaging functionality in a pre-existing application. My role encompassed both backend and frontend development to integrate this vital feature. Additionally, I played a crucial role in implementing new designs provided by another design team. My primary responsibility was to ensure the seamless integration of these designs into the existing application logic and structure, guaranteeing both visual and functional consistency using flutter. I also managed the maintenance of the messaging application's database using MongoDB, ensuring its efficiency and reliability.

Mobile Developer - Sans Services (April 2024 - September 2024)

I worked in the mobile development department, where I was responsible for maintaining the iOS and Android application, fixing bugs, and improving the user interface. This work was carried out using Android Studio for Android development and Xcode for iOS development.

Skills:

- Programming Languages: Java, JavaScript, TypeScript, Dart, Swift, HTML, CSS
- Mobile Development: Flutter, React Native, Xcode, Android Studio.
- Web Development: React, Next.js, TailwindCSS
- Software Development Tools: Visual Studio Code, GitHub, Postman.
- Database: MongoDB.
